INTERNATIONAL

1) El Niño phase

- As the world enters an El Niño phase—a natural climate phenomenon characterized by warmer waters in the Pacific—countries are bracing themselves for extreme weather events.
- The El Niño pattern fuels tropical cyclones in the Pacific, increases rainfall and flood risks in parts of the Americas and other regions, and can have far-reaching implications.
- This year’s El Niño is of particular concern due to its potential interaction with climate change, which could result in record-high temperatures and intensified extreme weather events.
